Fiberglass Surface Tissue

Introduction:

Fiberglass surface tissue is a thin nonwoven made of randomly distributed glass fiber. It's ideal for improving surface finishes, and has excellent chemical and weather resistance.

5cm wide tissue is specially designed for pipe winding. It has higher strength which ensure non-broken during production process.

Application:

It's suitable for hand lay up, press moulding and filament winding process.

Specifications:

ITEM	STANDARD VALUE	STANDARD NO.
Area Weight (g/m ²)	30±3.0	GB/T9914.3
Binder content (%)	7±3	GB9914.2
Moisture content (%)	≤0.5	GB11966
Tensile strength Machine direction(N/5cm)	≥30	GB7689.5
Wetting time(two layers) (s)	≤10.0	N/A
Width (mm)	50-1000	N/A
